

**THE U.S. CONGRESS INVESTIGATES KINSEY**  
By Audrey Werner R.N  
Article published in The Times – Calumet Newspaper 2003

Who was Dr. Alfred Kinsey? That depends on whom you talk to. NAMBLA, The North American Man/Boy Love Association, who advocates for the rights for men to have sex with boys, lionize him saying in 1981, “Gay Liberationists in general, and boy lovers in particular, should know Kinsey’s work and hold it dear...implicit in Kinsey is the struggle we fight today.”

However, some say Kinsey is the most evil man of the last century. Forty one members of Congress were so concerned that in 1996, they co-sponsored the “Child Protection and Ethics in Education Act,” which called for the US Congress to investigate the research and possible criminal activities of Dr. Kinsey. That’s because according to Kinsey’s own data, which was received as scientific truth and forms the basis for comprehensive sex education of American school children, there is the sexual abuse of 317 infants and boys documented in “Table 34” on page 180 of Kinsey’s “Sexual Behavior in the Human Male” (1948).

The Kinsey Institute has confirmed that Kinsey’s documentation of the sexual capabilities of infants and young children is not based on honest, ethical research but on the diaries of a single pedophile that molested hundred’s of children. This pedophile is publicly named, Rex King, on an August 1998 British television documentary on Kinsey entitled “Secret History: Kinsey’s Pedophiles.”

Pedophiles reported to Kinsey on how many “orgasms” babies, some as young as 2 months old, being abused over a 24 hour period, experienced. They were timed by a stop watch. How can one know if a baby, who cannot talk yet has had an orgasm? Kinsey described evidence of an orgasm as: “groaning, sobbing...sometimes with an abundance of tears (especially among young children)...violent cries, trembling, collapse...fainting...pained or frightened...will fight away from the partner.” Don’t worry though; Kinsey said these infants “derive definite pleasure from this situation.” Kinsey is dead but his legacy lives on. Kinsey’s claim that “children are sexual from birth” is the very foundation of everything sex educators teach our children today in the classrooms. I am a health professional and former sex educator and was unaware of the origins of the statement “children are sexual from birth” or the origins of sex education in the classroom so I did a little research.

Another place to investigate Kinsey is in the Sex Offense section of your state legal code. The campaign I work for, RSVP America has investigated over 30 states and has found Kinsey and his science to be the authority as to “normal” human sexuality. No surprise that consequently laws protecting women, children and the institution of marriage were weakened based on what we know to be criminally derived junk science.

Since those laws have been changed, America has seen a 993% increase in violent crime. Who am I to tell you this? A former sex educator who was mislead because of Kinsey data in my training, a woman of the medical sciences, who has seen the sexual disease wrought in our children. Kinsey’s “bad data” Dr. Judith Reisman said, would give us “bad results.” Kinsey believed in no moral protections, which he thought to be restraints. He said all sex is “normal,” and that it should be commonly shared with anyone and anything and that children are never harmed by adult/child sex, even incest and often

benefit. His intent was to shift this nation to an “anything goes” pleasure is the measure standard. To which I say not with my children, and not with my country you don’t!
